EXPERIENCE

Frontend Developer

Xeam Ventures

07/2023 Mohali, India

Leading HR company in Mohali

- Contributed to the official website of Xeam Ventures by adding animations, enhancing code clarity, and ensuring maintainability.
- Updated the Herman-Padel project, built with TypeScript and Next.js, by developing a fully functional booking system for both frontend and backend, enabling users to select slots across different courts, with integrated Stripe payment gateway.
- Led the development of the VisualEZ project using React.js and Vite, where I designed the UI and integrated Google Drive uploading and Google Sheets API functionalities.
- Collaborated closely with team members to deliver high-quality products within deadlines, maintaining minimal errors and clean code.
- Actively participated in developing efficient, reusable frontend components and UI elements.

EDUCATION

Electronics and Communications, 7.13

Punjab Engineering College Deemed University

2019 - 2023

12 th Grade, 76.4

SGGS Collegiate Public School

2017 - 2019

10th Grade, 9.8

Sophia Convent School, Kalka

2016 - 2017

ACHIEVEMENTS

NSS

Volunteered for the NSS club in college, dedicating my efforts to teaching children without any cost. Actively participated in the Bachpan program, which aims to promote child welfare by raising awareness and empowering individuals to combat child sexual assault through education and empowerment. I have also volunteered for the polio drive organized in Chandigarh.

Music Club

I collaborated with a group of singers and instrumentalists to showcase our talents in various music events organized by the music club.

APC club

I have been part of the Art and Photography club, where I actively managed and participated in a range of activities such as art and photography competitions.

SUMMARY

Dedicated frontend developer with a passion for writing efficient, clean, and maintainable code. Specializes in creating smooth and engaging animations that enhance user experience. Continuously eager to learn and adapt to new technologies, aiming to stay at the forefront of industry trends. Thrives in collaborative environments and is committed to delivering high-quality, responsive, and visually appealing web applications.

PROJECTS

Book My Show Clone

It is a replica of the popular online ticket booking platform, BookMyShow. It uses mainly React to build the user interface instead of CSS. It is a front-end implementation that aims to recreate the user interface and functionality of the original website., React.js, Javascript, HTML, NodeJs, ExpressJs.

Booky (Book Management)

This program is designed to assist school libraries in managing and finding books efficiently. The project leverages APIs to integrate external book-related services, enhancing the book discovery experience for users., NodeJs, ExpressJs, MongoDB

Tasky

The Todo Manager project is a simple yet powerful application for managing tasks and to-do lists. It provides an intuitive user interface to create, update, and track tasks, helping users stay organized and focused on their priorities., HTML, CSS, Javascript
